## DETAILED ACTION

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Arnold on 09/29/05.

The application has been amended as follows:

In Claim 1, between lines 2 and 3, insert --means for providing a source of x-rays; means for providing an x-ray image;--

In Claim 1, at lines 13 and 14, delete "smart device" and insert therein --control device--

In Claim 39, in line 2, delete "smart device" and insert therein --control device--

In Claim 40, in line 2, delete "smart device" and insert therein --control device--

In Claim 41, in line 2, delete "smart device" and insert therein --control device--

In Claim 42, in line 1, delete "smart device" and insert therein --control device--

In Claim 43, between lines 2 and 3, insert --a source of x-rays; an x-ray imaging device;--

In Claim 43, delete line 9.

In Claim 43, in line 12, delete "." and insert therein --; and a processor controlled device cooperative with the track reader for providing information for imaging of the object.--

Cancel claim 44.

***Allowable Subject Matter***

Claims 1-43 and 45 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 contains allowable subject matter for at least the reason that the prior art of record fails to teach or reasonably suggest a radiological imaging apparatus having means for supporting an object tray and an object thereon comprising source, imaging, compression, carriage means, the means for compression having a direction of mobility relative to the mobile carriage that is other than a direction of compression of the object, the means for compression comprising means for identification of the means for compression cooperating with means for reading of the mobile carriage regardless of a lateral displacement of the means for compression relative to the means for reading, the means for reading cooperating with a control device of the apparatus for providing an image of the object, as claimed. While art such as Defreitas (US 2005/0063509) and Zimmermann (US 2004/0064027) teach means for identifying interchangeable parts of radiological imaging apparatus, Zimmermann fails to teach identification regardless of a lateral displacement of the interchangeable part, and Defreitas fails to teach the means for compression comprising a means for identification that cooperates with a control device for providing an image of the object. Claim 43 contains allowable subject matter

Art Unit: 2882

for at least the reason that the prior art of record fails to teach or reasonably suggest a radiological imaging apparatus having a column for supporting an object tray and an object thereon comprising a source, an imaging device, a compression pad, a mobile carriage, and a plurality of identification tracks disposed at the compression pad for identifying the compression pad, a track reader for cooperating with the identification tracks regardless of a lateral displacement of the compression pad relative to the track reader and a processor controlled device cooperating with the track reader for providing information for imaging the object, as claimed. Claims 2-42 and 45 contain allowable subject matter at least by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
